

## Optimist style Dinghy “Frances Elizabeth”

Hand built, gaff rigged sailing dinghy built to high specification from Optimist plans and kit but not measured as an Optimist. Had it been measured when first built then it would very likely have passed but subsequent small rule changes mean that it would not now be possible to get a certificate.

Built out of marine ply, West System epoxy and screwed! Hull painted with International Interlux Yacht Enamel. All spars, rigging and sail in excellent condition come with storage/transport tube. Dagger board and rudder with quilted covers.

Superb, custom, aluminium-section launching trolley that can be disassembled and put in the back of a car.

Sail away price £600.00 we are open to offers!
